

### ADVANTAGES

- Ideal for filtering moderate concentrations of most external and internal source pollutants
- Compact filter with molecular media.
- Removal of gaseous contaminants
- Can be used to upgrade existing installations
- Classified according to ISO 10121-3

<b>Application</b>	Adsorption of odours and gases in air conditioning applications.
<b>Frame</b>	Plastic moulded
<b>Gasket</b>	One piece PU gasket (01 in the standard version)
<b>Media</b>	Activated Carbon
<b>Separator</b>	Hot-melt
<b>Sealant</b>	Polyurethane
<b>Dimensions</b>	Filter front dimensions according EN 15805
<b>Recommended final pressure drop</b>	2x Initial pressure drop
<b>Max Temperature (°C)</b>	40° C
<b>Relative Humidity max</b>	70%
<b>Installation Options</b>	Front and side access housings and frames are available.

The CitySorb filter utilizes a highly effective broad spectrum carbon media to ensure removal of a very wide range of airborne chemicals. The broad spectrum carbon operates with a Rapid Adsorption Dynamics (RAD) mechanism that is specifically designed to be highly efficient against the multiple chemicals that are typically present in low or moderate concentrations in city-centre buildings or other locations.
